EFFECTIVE: November 18, 2011

LAS VEGAS TRACON LETTER TO AIRMEN NO. 11-04

SUBJECT: After Hours Radio Communications at North Las Vegas Airport (VGT)

CANCELLATION: November 17, 2013

The Air Traffic Control Tower at the North Las Vegas Airport is a part-time facility. The Tower routinely suspends air traffic services as identified within the Airport Directory. During time periods when the North Las Vegas Tower is closed, Las Vegas Terminal Radar Approach Control (TRACON) is unable to communicate with aircraft operating on-the-ground due to the extensive high-rise developments located between the two airports. In an effort to facilitate communications after-hours, a communications system has been commissioned whereby personnel at the TRACON are able to select the North Las Vegas Tower Clearance Delivery frequency (124.0) from within the TRACON and communicate with these aircraft.

During time periods when the North Las Vegas Tower is closed, pilots on the ground at North Las Vegas Airport will be able to select the published Clearance Delivery frequency (124.0) and communicate with Las Vegas TRACON controllers. Pilots requesting ATC services, IFR clearances or needing to cancel IFR "inbound" to the North Las Vegas Airport may do so utilizing this frequency after the North Las Vegas Tower closes.

Stephen Lloyd
Air Traffic Manager
Las Vegas District
